Creative Technologist and UX Developer skilled in prototyping and delivering immersive environments with unique visual aesthetics. Adept at rapidly navigating emerging pipelines and evolving software ecosystems to consistently provide deployment-ready solutions. Experienced in collaborating with creative R&D professionals and ultimately dedicated to advocating for the end-user—leveraging robust technical workflows to engineer seamless, intuitive user experiences.

Education

Bsc (Hons) Interactive Media, University of York (2023 - 2026)

Ashton Sixth Form College, Awarded A*AAD at A-Level (2021-2023)

Work Experience

University of York Technician (School of Arts and Creative Technologies)
May 2026 - Present

- Collaborated with technical staff to expedite project operations, verifying that critical hardware, software, and infrastructure requirements were met.
- Monitored technical lab spaces regularly to maintain cleanliness, organization, and optimal operating conditions, ensuring a safe, efficient environment for staff and students.

University of York Research Technician (School of Physics, Engineering and Technologies)
March 2026 - April 2026

- Supported the coordinating of live, multi-site motion capture across a shared network
- Assisted in the engineering of real-time data pipelines using Unreal Engine Live Link to stream simultaneous performances from multiple locations into a single digital venue
- Facilitated a seamless virtual live concert experience so remote artists could interact and perform a live set together in a single shared virtual environment.

CoSTAR Live Lab Marketing and Events Coordinator Internship
June 2025 - December 2025

- Supported the development of technical projects supported by CoSTAR Live Lab
- Supported technical workflows moving motion capture footage to Unreal Engine for animating Meta Humans
- Gained experience with different motion capture technologies and techniques
- Create long term marketing strategy for best use of social media platforms
- Create, film and edit short form video content/image content for social media platforms
- Supporting the promotion, management and delivery of company events
- Represent CoSTAR Live Lab as part of Digital Presence working group within CoSTAR Network

Imminent XR Technical Assistant
August 2024 - October 2024

- Supported a team in developing virtual reality and virtual productions using Unreal Engine 5.2.
- Created 3D models using blender which were used in sculpting 3D virtual environments for virtual production.

- Assisted the Technical Director on set with managing the virtual environments in Unreal Engine.
- Created a pitch deck to apply for opportunities with Meta.

Technical Skills

Programming skills: C#, Web development skills (JavaScript, HTML, CSS)
Editing and creative practice: Adobe Creative Suite (Photoshop, After Effects, Premiere Pro, Audition, XD)
3D Modelling and Asset Creation: Blender, Procreate
Games Engines: Unity (C#), Unreal Engine (Live Link)

Additional Skills

President and Captain | ListerKato Volleyball Club | 2023 - 2025

- Encourage the maintaining of a friendly, welcoming environment in which new players feel comfortable and supported in their skill development.
- Communicated with other college team captains and organised friendly games/socials to promote positive relationships with other colleges.
- Collaborate on problem solving and upcoming events with the committee to ensure we operate efficiently as a club for students.

Achievements

Audience Favourite Award | Creative Technology Showcase 2026

- Awarded as recognition for my cozy sandbox style vr game, developed in Unity using the Steam VR plug with custom assets created in Blender.

Spotlight Award | Interactive Media Showcase 2024

- Awarded as recognition for my 2D pixel maze game, programmed using Javascript and assets created using Procreate.
